

SUNCHINE INSPECTION SERVICES

Quality Guarantee before Shipping

Who We Are?

Import-Export service company independent from any commercial interest in China and any other countries, Sunchine International Co. Ltd. and Web Commerce Worldwide are becoming associated in China and in France to offer to business people from the 5 continents all the tools and the services they need to maximize the safety of their purchases and productions in China.

The corporate culture and the way of doing business in China differ notably from the Western models. Our multicultural teams know very well these important differences that exist between the Chinese and overseas cultures.

Our business activities in China are divided in three distinct units:

- Import-Export Consulting, International Sourcing, Purchasing Management, Imports Follow-up and Management; Buying Office Solutions; Representative Office Management
- Quality Management; Auditing; Quality Control and Inspection Services; Laboratory Testing; Certificates Verification
- Business Interpreting and Translation Services in 11 languages; planning and organization of business trips; Canton Fair business and support services

Founded in 2005, the Quality Control and Inspection branch of Sunchine International Co. Ltd Sunchine Inspection Services has become one of the best inspection companies in China.

Sunchine Inspection Services serves over 1200 regular clients from all the Continents in the world and carried out over 25,000 inspections' missions in 2011 all over China. Its activities are constantly expanding.

Today, the highly qualified inspection team of Sunchine International Co. Ltd. is present in more than 55 main cities in China, which covers almost all the important industrial regions in China.

SUNCHINE INSPECTION SERVICES

Quality Guarantee before Shipping

Service

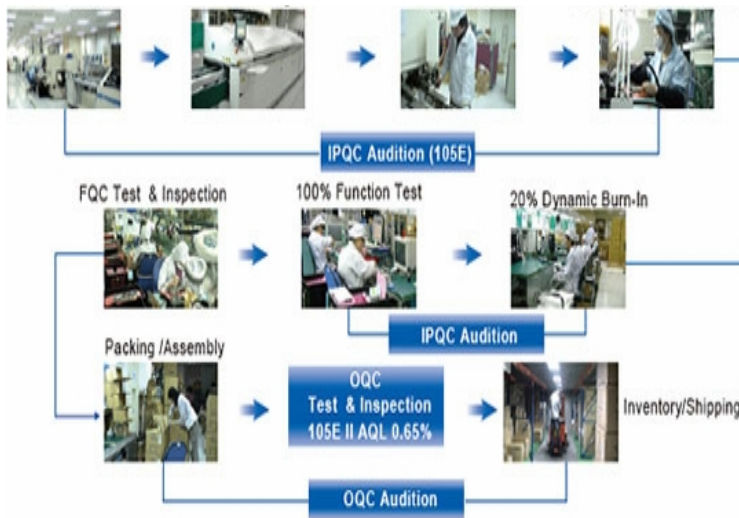

- **Production Monitoring (PM)**
Constant oversight in your factory with daily reports on quality and production status
- **Initial Production Check (IPC)**
Inspection of machinery, materials and accessories to be used for your order prior to production
- **During Production Check (DUPRO)**
Control and recommendations for production processes and capacity; this inspection is carried out when at least 20 % of your production is completed.
The inspector checks workmanship quality, raw materials, product appearance, weight check, size measurements, functionality assortment, accessories, labelling & logos, packaging, packing and other special requirements depending on the product specifications and the export market. The unfinished products and the compliance with the initial planning of production are also verified.
- **Pre-Shipment Inspection (PSI) also called Final Random Inspection (FRI)**
This inspection, the most important, guarantees the conformity of production to your specifications and international standards. The pre-shipment inspection takes place when 100% of the production is finished and packed. The inspector checks in the factory the completed products, the packaging and the packing by sampling according to the method AQL and the clients' own requirements and specifications.
- **Container Loading Check (CLC)**
Guarantee the finished and packed goods meet your specifications (product type and quantity) and are securely loaded for shipment.
- **Factory Inspections / Factory Audit**
Comprehensive assessment of the production facilities and organization according to ISO 9000 standards;
The factory Inspection confirms that your factory has the production capacity, technical know-how and quality to meet your production needs and requirements.
- **Social Audit**
Measuring a company's level of social responsibility according to SA 8000 standard
- **Laboratory Testing**
Ensures your importing products are in conformity to international regulations with complete content testing.
The tests are performed by internationally certified independent Chinese laboratories. We guarantee to you that the samples tested were taken from your production by our inspector, and not from a selection chosen by the factory.
